

BUSINESS MODEL · EDUCARE LEADS

Done-for-you enrollment marketing for childcare & education programs

We book qualified families onto your calendar and fill your programs to capacity in 90 days — and we work for free until you get results.

educareleads.com · Partner CRM: eNovo · Audiences: daycares, private schools & camps

1. What We Sell

We do not sell "leads" or "ads." We sell **full programs** — capacity filled, a waitlist building, and the owner's front desk freed from chasing parents. Delivery is **fully done-for-you**:

- **We build the enrollment machine** — hyper-local Meta & Google campaigns written, designed, and targeted to families within driving distance.
- **AI converts every lead** — instant text/email, qualifies, and books each interested family onto a call, tour, visit, or registration.
- **The client enrolls & we scale** — families show up ready to enroll; we track everything in a CRM, double down on what converts, and scale spend as the waitlist grows.

2. The Offer (Grand Slam Offer)

Value proposition

We book qualified families onto your calendar and fill your programs to capacity in 90 days — and we work for free until you get results.

Subhead: Fully done-for-you enrollment marketing for childcare & education programs. We've filled 37+ programs across the U.S.

The guarantee (primary risk reversal)

We'll get you 2x more converted leads in your first 30 days than your best month ever — or we work for free until we do.

"Converted lead" = a qualified inquiry: an interested family who has contacted the program and meets its enrollment criteria. Defined precisely so the guarantee is measurable and honest.

Why this wins: it's auto-tailored to each client's own track record ("best month ever"), it's concrete, and "work free until we do" removes the client's risk entirely.

Operational note: 2x on the qualified-inquiry unit (the widest, highest-count unit) is an aggressive bar for high-volume clients. Two de-risking levers, decided per deal: (a) base 2x on the client's *average* month instead of best, or (b) reserve 2x for programs under a volume threshold and use "more than your best month" for larger ones.

How the offer maximizes the Hormozi Value Equation

$$\text{Value} = \frac{\text{Dream Outcome} \times \text{Perceived Likelihood of Success}}{\text{Time Delay} \times \text{Effort \& Sacrifice}}$$

Lever	How we push it
Dream outcome ↑	"Fill your programs to capacity" / "2x your best month ever"
Likelihood ↑	Work-free-until-results guarantee + 37+ programs filled + childcare-only specialization
Time delay ↓	First qualified families in 7 days; 2x in 30 days; full in 90 days
Effort ↓	Fully done-for-you — no ad writing, no tech setup, no lead chasing, no new hire

Value stack (anchoring)

Deliverable	Anchored value
Hyper-local Meta + Google "Enrollment Machine" campaigns (built, written, designed)	\$4,000
AI lead-conversion system (instant text, qualify, book)	\$2,000/mo

CRM setup + lead tracking + weekly optimization	\$1,500
90-day enrollment playbook + done-for-you creative	\$2,500
The 2x Enrollment Guarantee (work free until hit)	Priceless

Anchor the price against **the cost of an empty spot** (~\$1,000–\$2,000/month each; \$12k–\$24k/year), which makes any fee look small.

Enhancers

- **Scarcity:** one program per local zip-code radius — "we won't run ads for your competitor down the street."
- **Urgency:** limited onboarding spots each month (cohort-based starts).
- **Bonuses:** Empty-Room Recovery Audit (free), front-desk visit-to-enrollment script, Waitlist Builder once at capacity.

3. Ideal Customer Profile (ICP)

The buyer

The **owner or primary decision-maker** of a childcare or education program — owner/operator, director, or admissions lead with budget authority.

The three audiences

- **Daycares & childcare centers** (incl. preschools) — tours → enrollment
- **Private & independent schools** — visits / open houses / applications → admission
- **Summer & enrichment camps** — registrations / sign-ups → enrolled campers

Qualification criteria (must-haves)

Criterion	Threshold
Monthly revenue	≥ \$25k/month (the gate)
Open capacity	Has real open spots to fill (not already at a long waitlist)
Locations	1–5 sites (single-site to small multi-site groups)
Market	U.S., local market with enough family density to support paid ads
Sales capacity	Someone on staff who can take calls/tours/visits and close
Ad budget	Willing to fund ad spend <i>on top of</i> the management fee

Psychographics & pain points

- Relying on referrals and "Google luck" to stay full; enrollment is unpredictable.
- Leads slip through the cracks because no one follows up fast enough.
- Past ad spend brought tire-kickers, not enrolled families.
- Owner/director is too busy running the program to run marketing.
- Empty spots = quiet, ongoing revenue loss they can feel but can't fix.

Trigger events (when they buy)

- A new location opening with rooms to fill.
- A season turning (fall enrollment, summer camp registration window).
- A competitor opening nearby.
- A recent dip in enrollment or a key referral source drying up.

Disqualifiers (NOT our ICP)

- Under \$25k/month revenue (can't sustain ad spend + fee profitably).
- Already at full capacity with a long waitlist (no problem to solve).
- No ad budget, or unwilling to spend on ads.
- No one available to follow up and close inbound families.
- Markets too rural/sparse to run effective local paid campaigns.

- Tiny in-home / micro operations below the revenue gate.

4. Funnel & Delivery System

Acquisition funnel:

- **Landing page** (proof-heavy, offer-forward) → CTA "Book Your Free Strategy Call."
- **/apply** — qualifying application (contact, program, market, locations, monthly revenue, #1 enrollment goal) + VSL.
- **/thank-you** — booking calendar embed locks in the call.
- **Strategy call** — qualify against ICP, present custom 90-day plan + exact numbers, close.

Lead routing: the form posts to `/api/lead`, which forwards to the eNovo CRM webhook (`ENOVO_WEBHOOK_URL`); leads are logged server-side if the CRM isn't wired, so nothing is lost.

Client delivery: campaign build → AI follow-up + CRM → weekly optimization → scale to waitlist.

5. Pricing Model

- **Qualification gate:** programs doing $\geq$ \$25k/month.
- **Structure:** management fee + client-funded ad spend (exact pricing set on the strategy call, by market and number of locations).
- **Profitability promise:** most owners are profitable on ad spend within the first month.
- **Risk reversal:** 2x Enrollment Guarantee — work free until the 30-day target is hit.

6. Differentiation

	Competitors (e.g. ScaleDaycares)	EduCare Leads
Positioning	Proof-heavy, "book a call"	Proof + a stated, measurable guarantee
Guarantee	Not stated up front	2x your best month or we work free
Audience	Daycare-focused	Childcare and education (daycare, school, camp)
Follow-up	Lead gen	AI conversion + full CRM, lead → enrolled
Specialization	Childcare	Childcare & education only

Core wedge: competitors lead with proof and leave the guarantee on the table. We lead with proof *and* put the strongest risk reversal in the industry front and center.

7. Partners & Stack

- **CRM:** eNovo (lead intake + nurture + pipeline).
- **Ad platforms:** Meta & Google (hyper-local).
- **Tech:** Next.js marketing site → `/api/lead` → eNovo webhook → booking calendar.

Brand tone: credible, private-school caliber — not techy or hypey. The offer is aggressive; the voice is trustworthy.
