

Enrollment Recovery Proposal

Prepared for	Eric Kuang - Jelly Bean Junction Early Learning Center
Location	Melbourne, FL
Program type	Large childcare center
Prepared by	EduCare Leads - 9503-3692 Quebec Inc.
Date	August 18, 2026

1. The Opportunity

Jelly Bean Junction Early Learning Center is a large childcare center in Melbourne, FL with programs serving children from **6 weeks old through 6 years old**, plus before- and after-school care.

190

Actual operating capacity based on staff, cubbies, and room readiness

112

Current enrolled seats

78

Open seats against actual operating capacity

Eric bought the school 5 years ago when enrollment was around **154 children**. The last couple of years have been on the decline, and the center is now at 112 enrolled.

Practical enrollment target: Eric expects at least **150 enrolled children by February 2027** and wants to start next year around **140-150 enrolled**. That means the immediate recovery target is **38 additional enrollments**.

2. Revenue Gap

Using the center's average tuition of **\$260 per week**, the 78 open seats represent:

\$20,280

Missed weekly tuition from 78 open seats

\$81,120

Missed tuition per 4-week month

\$973,440

Potential annual missed tuition

Infants are especially valuable, with tuition at **\$300 per week**. Because every room is approximately **2/3 full**, the growth plan needs to improve inquiry quality and conversion across the whole center.

The center currently produces about **\$100,000 per month** in revenue. Recovering enrollment toward 150 children would help Eric regain momentum, stabilize operations, and reduce the pressure of having to wear every hat himself.

3. Current Marketing Reality

- Word of mouth is currently the #1 source of inquiries.
- Google Ads started last week, but budget and conversion performance are not yet clear.

- The center averages about **5 new leads per week**.
- Conversion rate is not currently tracked.
- A previous service produced low-priority leads, forcing Eric and staff to spend time calling unqualified families.

Because of that experience, this plan needs to focus on **qualified leads**, not just more leads. The goal is to protect Eric and his staff from wasted follow-up while building confidence through tracking, proof, and a clear plan.

4. Recommended Plan: Enrollment Growth Partnership

Recommended path: **qualified leads + CRM + CRO + proof**

EduCare Leads will build and manage an enrollment system designed to help Jelly Bean Junction move from 112 enrolled children toward 150 by February 2027.

- ✓ **Local Meta ads** - Facebook and Instagram campaigns targeting families near Jelly Bean Junction.
- ✓ **Google Ads review** - review current search traffic, landing experience, and lead quality.
- ✓ **Lead qualification** - forms and filters that identify age group, start timeline, care needs, and parent fit.
- ✓ **CRM setup and management** - every lead organized by classroom, program, source, and enrollment stage.
- ✓ **Follow-up automations** - text and email follow-up so interested families receive fast replies.
- ✓ **Tour booking support** - helping move qualified families from inquiry to scheduled tour.
- ✓ **Full CRO review** - a conversion review of the enrollment path, messaging, lead forms, landing pages, mobile experience, and parent inquiry flow.
- ✓ **Proof and trust assets** - support collecting and using testimonials, parent verification, case-study style proof, and center differentiators.
- ✓ **Reporting** - visibility into ad spend, lead quality, booked tours, conversion rate, and enrollment progress.

5. Investment

Enrollment Growth Partnership

Item	Investment	Billing
EduCare Leads service management	\$3,000 / mo	Monthly
Required Meta ad spend	Minimum \$1,000 / mo	Paid directly to Meta
Full CRO review	Included free	Included
CRM, lead capture, and follow-up infrastructure	Included	Included

Meta ad spend is paid directly to Meta and remains fully under Jelly Bean Junction's control. EduCare Leads does not mark up ad spend.

6. Why This Approach Fits Jelly Bean Junction

Eric does not need random lead volume. He needs a system that brings in parents who are real, qualified, and ready to consider enrollment.

- A large center with real operating capacity
- Programs from infants through 6 years old

- Before- and after-school care
- A successful summer camp that served **145 children**
- A focus on being well staffed
- Quality furniture and a well-maintained center environment
- A clear operating philosophy: run the center like Costco, where families, staff, and children are happy

7. What Success Looks Like

- Qualified local family inquiries
- Lead quality by classroom and program
- Booked tours and tour show rate
- Lead-to-tour and tour-to-enrollment conversion rate
- New enrollments generated
- Progress from 112 to 150 enrolled children by February 2027
- Longer-term progress toward 190 actual operating capacity

8. Next Steps

1. Confirm the partnership package.
2. Complete onboarding and gather program details, photos, tuition, classroom availability, testimonials, and access.
3. Review current Google Ads, tracking, landing pages, and inquiry flow.
4. Build the CRM, lead capture, qualification, and follow-up system.
5. Launch local Meta ads and begin weekly optimization.
6. Track results against the 150-enrollment target.

Acceptance
