

6-Month Enrollment Recovery Strategy

Prepared for **Eric Kuang - Jelly Bean Junction Early Learning Center**
Location **Melbourne, FL**
Prepared by **EduCare Leads - 9503-3692 Quebec Inc.**
Date **August 18, 2026**

1. Core Goal

Jelly Bean Junction currently has **112 enrolled children** against an actual operating capacity of **190**.

150

Enrollment target by February 2027

38

Net new enrollments needed

6-7

Net new enrollments needed per month

Because Eric has been burned by low-priority leads before, this strategy prioritizes **lead quality, verification, and conversion tracking** over raw lead volume.

2. Positioning Strategy

Core message: large center resources, personal classroom feel

A well-resourced early learning center that still feels personal, well-staffed, and family-centered.

- Programs from infants at 6 weeks through 6 years old
- Before- and after-school programs
- Successful summer camp with **145 children**
- Well-staffed classrooms and quality furniture
- A leadership philosophy built around happiness for families, staff, and children

Eric's "run it like Costco" idea should come through as trust, consistency, value, care, and a happy experience for everyone involved.

3. Phase 1 - Tracking & Lead Quality Foundation

Timeline: Week 1-2

- Define what counts as a qualified lead.
- Create CRM stages: new lead, qualified, contacted, tour booked, tour showed, enrolled, lost / not fit.
- Track source by channel: word of mouth, Google Ads, Meta ads, referral, website, phone, walk-in.
- Add classroom, age-group, start timeline, and program-interest tags.
- Review current Google Ads structure, search terms, landing page, and lead quality.
- Create simple weekly reporting around leads, tours, enrollments, and conversion rates.

4. Phase 2 - Trust Assets & Proof

Timeline: Week 1-4

Eric said client verification, testimonials, case studies, and a clear gameplan would make him more confident. Those same assets will also make parents more confident.

- Collect 10-15 written parent testimonials.
- Collect 2-3 short video testimonials if possible.
- Create a "why families choose Jelly Bean Junction" proof section.
- Highlight the successful summer camp with 145 children.

- Capture photos or short clips of classrooms, furniture, staff warmth, and center quality.
- Build proof into ad creative, landing pages, follow-up texts, and tour reminders.
- Prepare a monthly performance case-study format showing leads, tours, enrollments, and lessons learned.

5. Phase 3 - Campaign Launch

Timeline: Weeks 2-6

- Test infant care starting at 6 weeks.
- Test toddler and preschool early learning angles.
- Test before- and after-school care offers.
- Use “large center resources, smaller classroom feel” as a differentiator.
- Filter leads by child age, desired start date, care schedule, program interest, contact info, and neighborhood.
- Use instant SMS, email proof, call tasks, tour booking prompts, reminders, and post-tour follow-up.

6. Phase 4 - Conversion Optimization

Timeline: Month 2-4

- Review lead-to-tour conversion rate.
- Review tour show rate.
- Review tour-to-enrollment conversion rate.
- Identify where families drop off.
- Improve call scripts, SMS scripts, and email follow-up.
- Test testimonials and proof assets in ads and follow-up.

7. Phase 5 - Scale Toward 150

Timeline: Month 4-6

- Prioritize rooms with the most immediate enrollment capacity.
- Increase ad spend only when lead quality and conversion are clear.
- Run retargeting to parents who clicked, visited, or started forms but did not book.
- Promote limited openings by age group.
- Add referral pushes to current families.
- Use summer camp proof to support year-round enrollment.
- Continue weekly pipeline review.

8. Weekly Scorecard

Metric	Why It Matters	Early Signal
New leads	Measures demand created	Volume is improving
Qualified leads	Protects staff time	Right families are entering
Booked tours	Shows real parent intent	Follow-up is working
Tour show rate	Shows follow-up quality	Families are committed
Enrollments	Measures business outcome	Seats are filling
Age-group demand	Shows rooms to prioritize	Budget can be focused

9. 6-Month Target Path

Milestone	Enrollment Target	Net Growth Needed
Current baseline	112	-
Month 1	118-120	+6 to +8
Month 2	124-128	+12 to +16
Month 3	131-136	+19 to +24
Month 4	138-143	+26 to +31
Month 5	144-148	+32 to +36
February 2027	150+	+38+

10. What We Need From Eric

- Access to current Google Ads performance
- Website or landing page access
- Photos and videos of the center
- Current classroom availability by age group
- Tuition and enrollment details
- Tour availability
- Existing parent testimonials or review links
- Confirmation of which leads the team considers qualified
