

Enrollment Growth Proposal

Prepared for **Moira - Chestnut Treehouse & Chestnut Treehouse 3**
 Locations **Lithonia, GA and Lawrenceville, GA**
 Prepared by **EduCare Leads - 9503-3692 Quebec Inc.**
 Date **August 13, 2026**

1. The Opportunity

Moira operates two childcare centers: **Chestnut Treehouse** in Lithonia, GA and **Chestnut Treehouse 3** in Lawrenceville, GA, approximately 30 minutes apart.

Location #1 is licensed for **148 children** and is currently sitting at **46 enrolled**, leaving approximately **102 open seats**. Location #2 has a similar opportunity, but the full classroom breakdown was not available at the time of this proposal.

Practical enrollment target: Moira said that reaching **85 children at each center** would make operations and day-to-day life easier. That creates a clear target of **170 total children across both locations**. For Location #1, that means moving from **46 to 85 children - 39 additional enrollments**.

Moira is competing in a dense market, with approximately **52 childcare competitors within a 20-mile radius**, including nearby competitors such as **Creekstone** and **Childtime**. Chestnut Treehouse is not a small center. The key positioning opportunity is to communicate that families get the strength and stability of a larger licensed center while still benefiting from the care, attention, and comfort of **smaller class sizes**.

Right now, enrollment marketing is mostly offline: banners in front of the locations and flyers handed out to local businesses. There are currently **no paid ads running**, which means Moira is competing in a crowded market without a consistent digital enrollment engine.

2. Location #1 Revenue Gap & 85-Child Target

Classroom	Licensed	Current	Open	Tuition
Infants	11	0	11	\$280 / wk
1 year olds	16	2	14	\$260 / wk
2 year olds	16	3	13	\$240 / wk
3 year olds	14	8	6	\$220 / wk
Georgia Pre-K	20	18, soon 19	1-2	State funded
Afterschool	33	13	20	Not provided
Additional 4-year-old room	24	0	24	Pending approval

For the paid infant through 3-year-old classrooms alone, the open seats represent:

44

Open paid seats, infants through 3-year-olds

\$11,160

Potential weekly tuition from those open seats

\$48,360

Approximate monthly tuition opportunity

\$580,320

Approximate annual tuition opportunity

To reach the first operating target at Location #1, Chestnut Treehouse needs **39 additional enrollments**. Based on the current gaps, the fastest path should prioritize infants, 1-year-olds, 2-year-olds, afterschool, and the upcoming 4-year-old / kindergarten room while protecting the near-full Georgia Pre-K classroom.

The afterschool program and additional 4-year-old / kindergarten room create even more upside. The additional room currently has **24 open seats** and is bringing in no revenue while waiting for expected state approval of the kindergarten program in October. If approved and filled as a private kindergarten program, that room could represent up to **\$252,000 per year** in program value at \$10,500 per child.

3. Recommended Plan: Two-Location Enrollment Growth Partnership

Recommended path: **Meta ads + CRM + CRO + follow-up**

Moira needs a two-location digital enrollment engine that turns local parent attention into inquiries, booked tours, and enrollments - with each center moving toward the 85-child operating target.

- ✓ **Local Meta ads** - Facebook and Instagram campaigns targeting families near Lithonia and Lawrenceville.
- ✓ **Two-location campaign structure** - location-specific targeting, creative, and lead tracking.
- ✓ **Competitive positioning** - messaging that highlights smaller class sizes, trust, stability, and convenience.
- ✓ **Lead capture** - forms and landing pages designed to turn parent interest into inquiries.
- ✓ **CRM setup and management** - every lead organized by location, age group, and enrollment stage.
- ✓ **Follow-up automations** - text and email follow-up so interested families do not fall through the cracks.
- ✓ **Tour booking support** - helping move families from inquiry to scheduled tour.
- ✓ **Full CRO review** - a conversion review of the enrollment path, messaging, lead forms, landing pages, and parent inquiry flow.
- ✓ **Reporting** - visibility into ad spend, leads, booked tours, age-group demand, and enrollment progress.

4. Investment

Enrollment Growth Partnership

Item	Investment	Billing
EduCare Leads service management	\$3,000 / mo	Monthly
Required Meta ad spend	Minimum \$1,000 / mo	Paid directly to Meta
Full CRO review	Included free	Included
CRM, lead capture, and follow-up infrastructure	Included	Included

Included CRO review: As part of the partnership, EduCare Leads will complete a full conversion rate optimization review of Moira's enrollment journey, including messaging, lead forms, landing pages, calls-to-action, mobile experience, and parent inquiry flow. Meta ad spend is paid directly to Meta and is never marked up by EduCare Leads.

5. Why the Partnership Option Makes Sense

Conversion matters, but with two locations, 52 nearby competitors, and a major capacity gap, the bigger opportunity is the full enrollment system:

- Ads generate consistent local parent attention.
- Landing pages, forms, and inquiry flow turn that attention into inquiries.
- CRM and automations make sure every lead is followed up with quickly.
- Tour booking creates the path from interest to enrollment.
- Reporting shows which age groups and locations are converting best.
- Ongoing management keeps campaigns improving instead of sitting still.

With Location #1 alone representing approximately **\$48,360 per month** in paid infant through 3-year-old open-seat opportunity, even a small number of new enrollments can quickly offset the monthly marketing investment.

6. What Success Looks Like

The immediate goal is to build a consistent pipeline of local families for both Chestnut Treehouse locations, beginning with the largest revenue gaps at Location #1 and moving toward **85 children enrolled at each center**.

- Qualified local family inquiries
- Booked tours by location
- Leads by age group
- Follow-up response rates
- Cost per lead and cost per booked tour
- Enrollments generated
- Progress toward 85 children enrolled at each center
- Location #1 progress from 46 to 85 children
- Progress toward filling priority classrooms and afterschool openings

7. Next Steps

1. Confirm the package Moira wants to move forward with.
2. Complete onboarding and gather photos, classroom details, licensing notes, program details, schedules, tuition, and access.
3. Build the CRM, lead capture, and follow-up system for both locations.
4. Launch local Meta ads for Lithonia and Lawrenceville.
5. Track leads, follow up with families, book tours, and optimize toward enrollments.
